

CGAppBar Specification

Description

The CGAppBar component will be used by authenticated users to quickly perform common actions and navigate the app.

Usage

The CGAppBar component can only be seen by authenticated users. It will be the top-most element of every page which only authenticated users have access to.

Subcomponents

- CollaboGreat Logo
 - Appears on the far left side of the component
 - When clicked, the user will be redirected to the dashboard page
 - Depending on the screen size, either the full logo (large screens) or icon only logo (small screens) will be used.
- Search Bar
 - Appears in the middle of the component
 - When used, search results for the users tasks, projects, and teams will be displayed (in that order)
 - On a smaller screen size, this component will be moved to its own row
- Create Button
 - Appears on the right side of the component
 - When clicked, the create dropdown will appear directly below the sub-component
 - On a smaller screen size, this component will turn into a button with only a “+” icon
- Notification Button
 - Appears on the right side of the component
 - When clicked, the notifications dropdown will appear directly below the sub-component
- Avatar Button
 - Appears on the right side of the component
 - Displays an image of the user, if no image is provided then it will display their first initial in front of a colored backdrop
 - When clicked, the user menu dropdown will appear directly below the sub-component
- Create Dropdown
- Notifications Dropdown
- User Menu Dropdown
